

MANSVI KAPSE

Aspiring SOC Analyst | Cybersecurity

+91-9892067031 • mansvikapse11@gmail.com • [LinkedIn](#) • [GitHub](#) • Navi Mumbai

PROFESSIONAL SUMMARY

SOC Analyst candidate with a Bachelor of Science in Information Technology (CGPA 9.65) and hands-on alert triage, log analysis, and phishing investigation experience. Skilled in using Splunk, Wireshark, and CyberChef to investigate simulated incidents and make documented close-or-escalate decisions. Completed the Tata Group Cybersecurity Analyst job simulation (Forage). Eager to leverage hands-on simulation experience to deliver immediate value as a Junior SOC Analyst.

TECHNICAL SKILLS

SOC & Cybersecurity: Alert Triage, Security Monitoring, Log Analysis, Incident Investigation, Incident Response, Phishing Investigation, IOC Analysis, Technical Documentation

SIEM & Tools: Splunk, Wireshark, CyberChef, TryHackMe, GitHub

Networking: TCP/IP, DNS, HTTP/HTTPS, DHCP, ARP, ICMP, OSI Model, Ports & Protocols, Firewall Fundamentals

Operating Systems: Linux, Windows, Linux Command Line, File Permissions, Processes, System Logs, Windows Event Logs

PROJECTS

Phishing Email Investigation & Triage

- Triaged 3 simulated phishing emails to determine which were safe and which required escalation.
- Analyzed sender details, email headers, content, URLs, attachments, and IOCs using a structured triage process.
- Classified 2 emails as legitimate and 1 as malicious phishing, documenting the evidence behind each verdict.

SOC Incident Response Simulation

- Investigated 3 simulated security alerts to decide whether each should be closed or escalated.
- Performed log analysis and evidence gathering to validate each alert.
- Closed 2 alerts as false positives and escalated 1, documenting findings and reasoning for every decision.

Windows Event Log Investigation (Splunk)

- Searched Windows event logs in Splunk to detect failed login attempts.
- Used Windows Event ID 4625 to identify and review failed login events.

Linux Security Investigation

- Reviewed `/var/log/auth.log` and other Linux system logs during an investigation exercise.
- Checked file permissions and running processes to complete the investigation.

Wireshark Network Analysis

- Analyzed DNS traffic and the TCP handshake in Wireshark packet captures.
- Applied networking fundamentals (TCP/IP, DNS) to interpret protocol behavior.

EDUCATION

Bachelor of Science in Information Technology

Sanpada College of Commerce and Technology — Mumbai University

Graduate – 2026 | CGPA: 9.65

CERTIFICATIONS & VIRTUAL EXPERIENCE

Fortinet Cybersecurity and Cloud Fundamentals 1.0 — Fortinet (Credly credential) | 2026

Tata Group Cybersecurity Analyst Job Simulation — Forage (virtual experience)
